Q3 2025

#### Comments on deviations:

The building permit was applied for in April 2023 and was in Q4 2023 finally approved by the municipality of Stockholm. Normal processing time is 10 weeks, but the municipality asked for an increase in processing time. Project planning and preparations have in the meantime taken place simultaneously from the project developer to keep the overall project timeline as far as possible. The sale process is planned to launch in Q2 2024 when the market sentiment is expected to have strengthened.

The deviations are hence related to an extended building permit process.

#### Comments on deviations:

The deviation for milestone 2 and 3 is related to ongoing discussions with other developers in the Primus area whether one or two separate garages are needed for the residential development. The garage will be located on an adjacent property. The timeline for milestone 5 will be determined when the contractor agreement is procured.

#### Comments on deviations:

The updated total budget amounts to SEK 253M and has been unchanged since the last project report. Overall budget increase can partly be derived from increased forecasted interest rates of approximately SEK 10M and partly due to heavily indexed construction costs amounting to approximately SEK 20M.

Furthermore, the building's location and unconventional shape along with conscious add-ons to defend a higher selling price constitutes the remaining budget change of approximately SEK 46M.

Pricing for the project is discussed on an ongoing basis with the contracted broker engaged in the project. The product's quality is deemed to motivate an overall higher pricing strategy.

Construction agreement for the project was signed during Q2 2023. The agreement is a fixed priced turnkey contract with the contractor MVB ÖST AB.

During Q4 2023 the project reached milestone 3 by getting a granted building permit. Due to the delayed building permit process, the project has had time to work up more costs (actual) in terms of preparatory groundwork and project planning with the construction contractor, compared to the budget point in time for an approved building permit in the original milestone 3. This to meet the overall project timeline as far as possible.
